

## Powder Coated Aluminium 40mm Balustrade System

This system can be used in various situations, such as decks and stairs, and can also be supplied and installed to comply with pool fencing requirements. All styles shown are the same system, with different style balusters (pickets) and top rails used. Any of these aluminium systems can be powder coated to your specific colour requirements.

2 other options to the 16mm round balusters, as shown in the examples above, are a 35 or 76mm oval baluster. The 76mm oval baluster gives a similar look to the traditional timber style handrails.

### Powder Coated Aluminium 50 / 60mm System

This is a more heavy duty system, when compared with the 40mm system, and is more suited to commercial applications. It consists of a 60mm round top rail, 50mm round posts and bottom rail and either 16 or 19mm round pickets.
